This table highlights the importance of keywords. To improve your chance of ranking high in search engines for a specific keyword, you should use your most important keywords throughout your content, within your title tag, meta description tag, and headings.

SEO RECOMMENDATIONS

HIGH PRIORITY

We can't find a <meta name="description"> tag, make sure there is one within your <head> tag.

Your social share count is low. You can improve the rank of your site by creating high-quality content that people want to consume and share.

You need to increase your back links, you should consider creating an email outreach program.

Create more content rich pages, as it will help you rank for more long tail keywords.

MEDIUM PRIORITY

Title tags are an important on-page factor for SEO. Aim to make your title tag more descriptive but containing fewer than 70 characters. This is the limit Google displays in search results.

LOW PRIORITY

We've noticed that you have <H> heading tags that are too long or too short. Its best to keep your heading tags between 15 and 65 characters.

The majority of the keywords are not found in the site title. Make sure you place your most descriptive keywords in the site title.

The majority of the keywords are not found in the meta description. Make sure you place your most descriptive keywords in the meta description.

The majority of the keywords are not found in heading tags. Make sure you place your most descriptive keywords in heading tags.
